

Metalbilt[®] Heavy Duty Steel Framed Panel Doors

Applications

Ideal for public facilities, changing rooms, remote locations, vandalism prone sites, warehouses, offices, commercial entrances, record rooms and hotels.

Features

Metalbilt pressed steel doors have been carefully designed to suit local conditions and the demands of public usage, they are custom engineered and fabricated in a range of sizes, with vision panels and louvre options.

Metalbilt Flush Panel (Hollow Core) Doors provide ease of mind when it comes to security solutions due to its robust design. It is ideal for internal or external use where doors may be subjected to considerable abuse.

Metalbilt Solid Core Timber Doors are perfect for internal use or in sheltered external areas. For medium security solutions. A 0.5 mm thick clad and capped option can be added for extra impact resistance.

*Over 60 years of manufacturing experience and continuous refinement.
Service and repairs, 24 hours a day, on all makes of commercial doors.*

Metalbilt® Solidcore (Steel Clad & Capped) Jamb Detail

Metalbilt® SCT5

Metalbilt® SCT6

Metalbilt® SCT7 Split frame

LEAF

"Solidcore" timber leaf MDF faced for internal use. For external, or situations requiring more robust construction, we offer our P core marine ply LVL faced. We have a selection of leaf thicknesses available for your security and acoustic needs.

To prolong the life of the door, head flashings are required for external installations (by others).

VISION PANELS

Internal/External glazing available in a wide range of sizes. Multiple vision panels permitted with different beading options also available (timber and aluminium). Please note: vision panels not available on exterior doors, if steel clad and capped.

CLADDING

An internal/external quality timber solidcore can be clad on each face with a 0.5 mm galvanised steel or 1 mm aluminium sheet and then capped on all four edges with a 0.7 mm steel adhesive fixed folded channels. We also have a large range of veneers to choose from. (for more about our veneers please contact us)

FRAME

Single or double rebated, folded steel frames are constructed using 1.6mm steel sheet, with fully welded corners, which are ground flush.

Preparations are provided for lock strike plates and door hinges.

HARDWARE

We supply 100x75x2.5 stainless steel hinges, or as required to support the weight of the leaf. Metalbilt standard design configuration applies, hinges and hinge placement may vary depending on door size and type.

Where required, Locks, handles, closers etc. are typically supplied by your hardware supplier to Metalbilt, to enable such hardware to be detailed. Hardware will be supplied loose under separate cover.

Metalbilt has standard hardware also available which includes, Mortice and Cylindrical lockset and furniture options, Ryobi closer and custom kick plates.

FINISH

Door and frame Spot primed electro galv steel for internal doors and spot primed Galv steel for external doors, supplied to site, as a pre-hung assembly, or two separated items, depending on the size of the components.

Powdercoating finish is also available using Dulux colour range for special finishes please speak to one of our sales reps for more information.

We reserve the right to alter specification without notice and without incurring obligation.
